The gameplay in Minecraft is great, but nothing can beat the feeling of being able to make a zombie run through a field with a machine gun and shoot your friends. There are no rules in Minecraft, which means that you can do whatever you want. Although it is tempting to download those mods that will let you kill your enemies, or add more weapons in the game, it is not recommended because it can be hard to tell which mods are safe to download. Plus, you could end up with some malware on your computer if you don't know what you are doing. It is much better if you choose mods that add something else to the game instead of changing how things work. In my opinion, one of the best mods to download would be N.P.C (non-playable characters) mods. The mod is basically a bunch of programs that you can add to your game, and they will make it much more interesting than it already is. There are plenty of N.P.C mods out there, but one I have found to be very interesting is the Steve mod. The Steve mod allows Minecraft characters (like the player) to run around on their own and move in any direction they want – all you have to do is give them a path to follow by making blocks for them to walk on."

The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you out. If you want to obtain the same advantages of cheats, but don't want the risks associated with cheats, then try using mods instead.

Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders."

Players build a random world in which you aren't guaranteed the same biome behind every block. All the biomes can be accessed by "spawning" into them in survival mode through an anomaly. Sky Block Servers: Players have to survive on floating islands - These servers are focused on playing mini games in order to win rewards."
